

Throughout June we have experience a high volume of graffiti in our Metcalf Way Pocket Park. Our in house intensive cleaning team have been able to assist with getting this removed as quickly as possible.

This has occurred on 4 separate occasions.

Our team have been out opening up all pathways throughout Crawters Brook.

This area will now be added onto our regular grass cutting round to ensure stinging nettles/brambles are kept cut back.

In total we managed to remove 200kg of green waste.

Our team completed Gateway 1 shrub bed, this was done on a Saturday due to heavy traffic throughout the week.

By reducing this hedge we were able to allow visibility to the shop fronts.

We have also been able to complete various other tasks in between grass cutting and litter picking.

The shrub beds within the new Pocket Parks have now been weeded, (Priestley Way/Rutherford Way are now completed).

These overhanging branches along Woolborough Lane have been cut back to prevent the pathway from being obstructed.
