

Manor Royal BID Maintenance Team: May Picture Report

Pocket Park shrub areas have been weeded, removing these weeds will help to reduce regrowth next year. This also helps to prevents the plants from getting diseases from the weeds.

Seating areas in Crawter's Brook have been cleared to allow for better access.

We continue to edge grass verges throughout Manor Royal allowing access to the footpath and cycle path. You can see from the above just have much overgrowth there was.

Location – Gatwick Road.
