

Now that we have taken over the maintenance of the Gateway 2 triangle, our team had a big job ahead of them as it was very overgrown. It is now free of weeds and long grass. Our team removed a huge 400kg of weeds from this area.

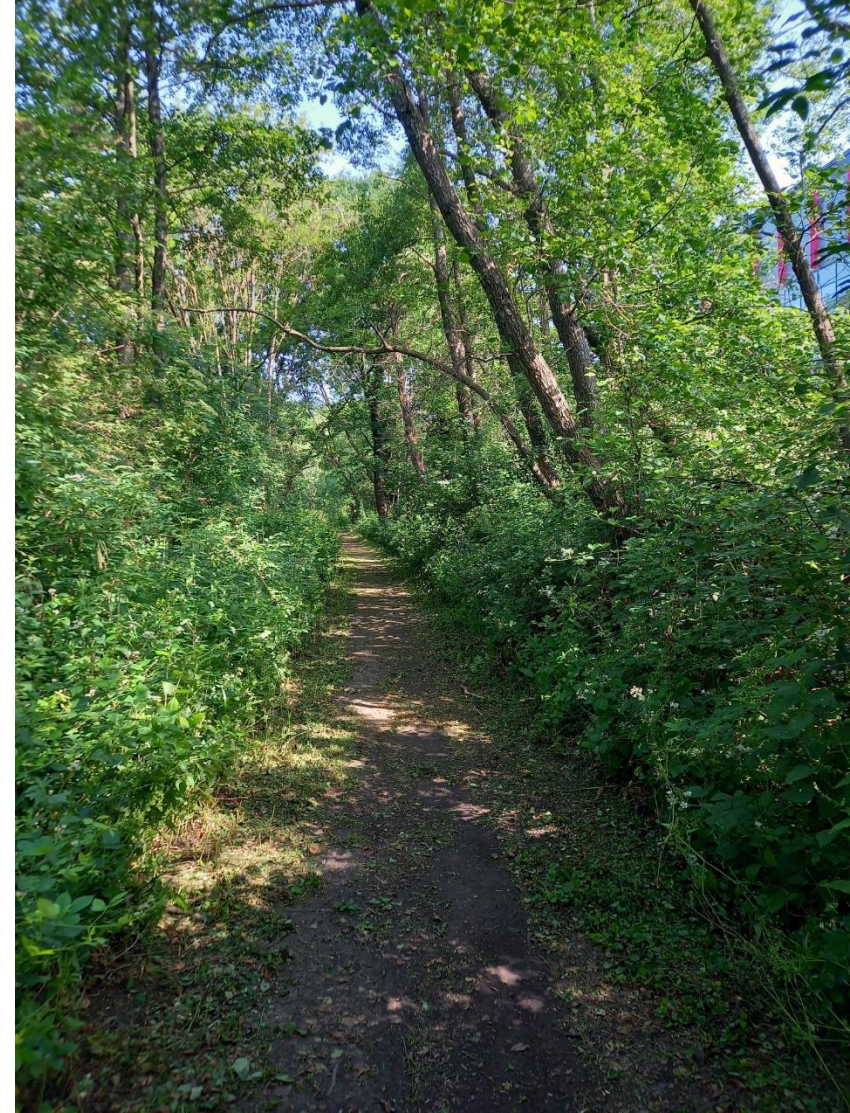

Gateway 1 shrub bed planters have been weeded and tidy to keep the entrances into Manor Royal looking well presented.

Our 3 bins within Crawler's Brook have had a revamp, these have been treated to prevent rust and repainted.

All footpaths through Cawter's Brook have been cut back, allowing better access for the public.

Our wildflower areas in The Terrace are starting to blossom. In the coming months you will start to see a lot more wildflowers starting to come through from the areas that were sewn.
