

Fly tipping and litter has been our main priority over this last month

We have accumulated 1,860KG of litter and fly tipping combined in January

We have been targeting  
grots spots that were  
inaccessible for the public.

From this job alone we were  
able to remove 120KG of  
green waste and litter  
combined

Location: County Oak Corner (Zone 1)

With some added support from our in house tractor team we have been able to clear ditch lines.

This will help us to keep waterways clear and to make litter more accessible in the future.

Location: Langley Green Cycle Lane leading to Metcalf Way Micropark (Zone 1)

Old faded banners are being replaced in various areas to ensure they're clear and visible.

As you can see from this photo there is a massive difference in appearance.

We will be continuing to replace these banners and to also fix the ones that have broken brackets.
