

MANOR ROYAL MAINTENANCE TEAM PICTORIAL REPORT SEPTEMBER & OCTOBER 2021

We have started clearing some of the grot spots and overgrown areas within Manor Royal.

We started at The Terrace opening up the surrounding areas.

As you can see from the pictures by opening up the area it has created a more welcoming and safe place for public to walk.

All Waste generated by opening up the area was recycled by shredding and mulching down on site, the only waste that needed to be removed and was the Litter which came to 45KG

Now the main clearance work has taken place, we will be able to maintain the area better

So far a total of 420KG of leaves have been collected from Manor Royal

Opening up and clearing an area on Kelvin lane.

There was lots of litter and general fly tipping, 268KG of waste and litter was removed from the area.

we have participated in some weekend clearance work on Crompton way, this is an area that proves difficult to maintain during the week.
