

RE-ENERGISE MANOR ROYAL

Working for a cleaner, greener Business District

What is Re-Energise Manor Royal?

Re-Energise Manor Royal (REMR) is an independent non-profit Local Energy Community, established to invest in and promote renewable energy projects across the Manor Royal Business District. Maximising the deployment of rooftop solar energy systems, REMR aims to help Manor Royal move towards a low carbon and low-cost energy community by 2030.

Who are REMR?

Established by the Manor Royal BID with the help of West Sussex County Council and Crawley Borough Council, REMR is managed by the community it supports - Manor Royal businesses representatives and property owners. This ensures all the benefits of REMR and the projects it delivers are retained and protected for Manor Royal and its community.

Who are BHESCO?

Brighton & Hove Energy Services Co-operative (BHESCO) are the delivery team for the programme. BHESCO are a social enterprise who design, finance, and project manage low-carbon energy projects on behalf of their clients. Their team includes Kayla Ente MBE, Richard Dow, Alex Williams & Simon Punyer.

BECOME AN REMR SOLAR PV SITE:

- Significantly reduce your company's electricity costs.
- Our solar PV experts will install, commission, operate and maintain the system, depending on your needs.
- REMR can potentially fund the upfront costs, so you can use cash reserves for other needs.
- Strengthen your contribution to our national Net Zero target by reducing your carbon emissions.
- Become one of a community of generators with the capability of trading power with others at Manor Royal, further reducing your costs and CO₂ emissions.
- Strengthen REMR to allow it to support its envisioned community of projects including energy surveys and Electric Vehicle charge points for Manor Royal.
- Find out how much your business can save on its energy costs by participating in this exciting programme.
- Transform your business's rooftop into a Solar Power station, making clean electricity to drive your business forward.

Requirements:

Building owners or tenants welcome to apply

Available roof size typically > 1000m²

Current electricity consumption typically > 50MWh per year

Once the programme gains momentum, a wider range of businesses will be encouraged to participate.
