Manufacture Local, Deliver Global

Collected by Melba Swintex
Processed by Melba Swintex
Reused by Melba Swintex

Closed Loop Recycling

- Closed-loop recycling is a solution from Melba Swintex to battle plastic waste heading to landfill. Old products are processed and blended then manufactured into new products.
- The customer is required to notify their local distributor or Melba Swintex they have end-of-life products on site. These will need to be palletised and secured to the pallet so that they are safe to collect, a Forklift needs to be present on site.
- The Melba Swintex lorry is available at a reduced fee of £32 per pallet for up to 10 pallets, 11+ pallets £25 each 22 pallets max. 13 for Barriers, or you can deliver back to Melba Swintex end of life products back to site Free of Charge. This will still need to be booked in.
- Pallets are collected when the lorry is local to the site, this could be the next delivery, which reduces Carbon emissions.

Products manufactured from 100% Recyclable materials
