

Eden Utilities **Fund**

Eden Utilities have designed a product to **support our clients** along with **mitigating price risk from energy buying**.

The aim is to buy in a more strategic way to traditional fixed priced procurement. If you fix your price, you are **locking in 100% of the energy on one day out of 365 in the year**. This comes with a degree of risk and you are unable to amend the price once contracted.

The **Fund** is a **low-risk strategic alternative**. You will join similar sized clients together in an aggregated buying product.

Eden will buy the volume **strategically, little and often at market dips**.

(we buy here...)

...so you don't pay here!

CORE BENEFITS

BUYING POWER

STRATEGIC BUYING

SMOOTHED PRICE

VOLUME PROTECTION

SEASONAL FORECASTED PRICE

Eden Utilities Fund

KEY FEATURES

Clients are **grouped** with **one** energy **supplier**.

Ability to **sell back** and unlock price, e.g., in a falling market.

SELL

The energy is executed by **Eden's Trading team**.

We look for **dips** and **buy volume** via a **hedging strategy**.

Re-forecast volume at **any time**.

We can buy **100%** and turn it back into a **Fixed contract**.

Option to buy **Full Green Energy** – 100% **REGO** Backed.

Fixed or **Pass Through** Non-Commodities charges.

EDEN'S BUYING STRATEGY

- Eden's Trading team will conduct buying.
- Seasonal buying – Winter/Summer.
- The price will be 100% bought prior to season expiry.
- Performance reporting will be issued weekly.
- Fully Delivered Forecasting is available.
- Full Reporting accessed via Eden's online platform.
